

## Common Diagnosis Code Reference Tool: Generic Listing

In order for Beaumont Laboratory to bill for services provided, you must specify a valid, medically appropriate ICD-10 code(s) which is supported by the patient's medical record, for each laboratory test that is ordered, including all tests listed as part of organ or disease-oriented panels. Medicare will only pay for tests that are covered, reasonable, and necessary for the individual patient given his or her clinical condition. The following list is being provided for your convenience and includes commonly used codes by medical specialties that were posted on CMS' website in preparation for ICD-10 . Per CMS, codes most frequently used by your practice will vary based on geographic location, patient population, payer mix, and other differentiating factors. This listing is not all inclusive. Refer to an ICD-10 code book or other coding reference for diagnosis codes not listed. CMS website designated some codes on this list with an asterick \* noting "codes with a greater degree of specificity should be considered first".
