

Beaumont Laboratory EPIC Beaker LIS Implementation

Effective Date: November 1, 2020

In July 2018, Beaumont Laboratory began a project to replace the current laboratory information systems at all campuses to truly standardize Beaumont Health's laboratories into one. The organization has chosen EPIC Beaker as the software to replace the various systems used within the laboratory.

The systems being replaced are:

- SCC Soft (legacy Grosse Pointe, Farmington Hills, Royal Oak, and Troy hospital laboratories)
- Sunquest (legacy Dearborn, Taylor, Trenton, and Wayne hospital laboratories)
- Co Path (legacy Dearborn, Taylor, Trenton, and Wayne hospital laboratories)

The laboratory has been developing EPIC Beaker in a partnership with the Information Technology Department. The implementation will be in two phases as follows:

- November 1, 2020 – Grosse Pointe, Farmington Hills, Royal Oak, and Troy
- April 4, 2021 – Dearborn, Taylor, Trenton, and Wayne

The change will impact all employees who deal with the ordering, collection and processing of laboratory specimens.

The advantage of making this change is that all Beaumont Health laboratories will be operating on a standardized platform. This should provide a seamless experience for providers utilizing the laboratory and the patients we serve.

A more comprehensive bulletin will follow regarding the test menu changes, closer to the implementation date of EPIC Beaker.

If you have questions, please contact your Beaumont Laboratory Customer Service Department:

- Farmington Hills, Grosse Pointe, Royal Oak and Troy: 800-551-0488 or 248-551-1155, Option 5
- Dearborn, Taylor, Trenton and Wayne: 800-245-3725, Option 1

Date submitted: September 4, 2020
