

Xpert Xpress SARS-CoV-2/Flu/RSV Four-In-One Test

Effective Date: November 16, 2020

Laboratory Bulletin

Respiratory viruses typically follow a seasonal pattern with an increase of respiratory virus infections beginning in November/December. Symptoms of a respiratory virus infection may include fever, cough, sore throat, and malaise, which is also seen in patients with COVID-19. Due to the differences in patient treatment and management, it is necessary to differentiate COVID-19 from other common respiratory infections such as influenza or respiratory syncytial virus (RSV). To aid clinicians in providing a proper diagnosis, Beaumont Laboratory will be offering the Xpert Xpress SARS-CoV-2/Flu/RSV test, a rapid, multiplexed real-time RT-PCR intended for the simultaneous detection and differentiation of SARS-CoV-2, influenza A, influenza B, and RSV. If RSV infection is not suspected, Beaumont Laboratory will also offer a separate orderable for the simultaneous detection and differentiation of SARS-CoV-2, influenza A and influenza B.

Due to allocation of reagents, this testing will only be available for hospital patients. Beaumont Laboratory will continue to offer standalone Flu A/B, Flu A/B/RSV and SARS-COV-2 assays for outpatients and independent providers who use Beaumont Reference Laboratory.

Test Information:

Name: COVID-19, Flu, RSV by NAA
Order Codes: FMH, GRP, RYO and TRY: LAB8434
DBN, TAY, TRE, WYN: LAB08434
CPT Code: 0241U
Specimen: Nasopharyngeal swab
Schedule: Testing will be performed STAT

Name: COVID-19, Flu A and B by NAA
Order Codes: FMH, GRP, RYO and TRY: LAB8435
DBN, TAY, TRE, WYN: LAB08435
CPT Code: 0240U
Specimen: Nasopharyngeal swab
Schedule: Testing will be performed STAT

STAT test results should be available within 2.5 hours
