

## Respiratory Virus Panel by PCR

**Effective Date: March 22, 2021**

Beaumont Laboratory will resume Respiratory Virus Panel by PCR testing on March 22, 2021. The respiratory virus panel test was temporarily suspended due to a shortage of reagents, which were being allocated to COVID-19 testing. Testing reagents have stabilized and the Respiratory Virus Panel by PCR is orderable using code LAB6404.

### Test Information:

Name: Respiratory Virus Panel by PCR  
Order Codes: LAB6404  
CPT Code(s): 87632  
Specimen: Nasopharyngeal (NP) Swab  
Schedule: Results available within 24-48 hours  
Summary: Multiplex nucleic acid amplification test that detects 19 commonly encountered respiratory viruses. This panel does not detect SARS-CoV-2.
