

### Trichomonas by PCR: Testing Update #3

**Effective Date: March 15, 2021**

Beaumont Laboratory will resume testing Trichomonas by PCR effective March 15, 2021. These reagents have stabilized and healthcare providers can resume ordering molecular detection of *Trichomonas vaginalis* on specimens from both males and females. Ordering information can be found below and in the [Laboratory Test Directory](#). Please note, as testing supplies continue to stabilize, testing delays may still occur for the next several months.

#### Test Information:
