

Trisomy 18 Risk on Serum Maternal Screens

Effective Date: April 19, 2021

Effective April 19th a risk for Trisomy 18, whether increased or not, will be provided for the following maternal serum screens:

- 2nd trimester Quad screen
- Sequential/Integrated screen
- First Trimester Down syndrome screen

The cut-off for reporting an increase in Trisomy 18 is 1:100

The information will be available in the brief Epic report; it will also be listed on the detailed report in a comment field. The detailed report is available as a link in Epic and is also delivered to doctors' offices.
