

Respiratory Virus Panel by PCR

Effective Date: October 11, 2021

Beaumont Laboratory will offer a new Respiratory Virus Panel by PCR that also detects SARS-CoV-2. This new RVP test is the same as the current RVP test (same manufacturer, instruments, and reagents) except with the addition of the SARS-CoV-2 target. There will be no change to the test name, ordering, collection, and specimen type. With the addition of the SARS-CoV-2 target, the CPT code will change from 87632 to 87633. Including SARS-CoV-2 in the Respiratory Virus Panel by PCR will aid in the diagnosis of respiratory illnesses by providing a single comprehensive test for respiratory pathogens. As a comprehensive test, orders received for other respiratory viruses (SARS-CoV-2, influenza A/B, and RSV) may be considered duplicate and canceled.

Test Information:

Name: Respiratory Virus Panel by PCR
Order Codes: LAB6404
CPT Code(s): 87633
Specimen: Nasopharyngeal (NP) Swab (preferred)
Schedule: Results available within 24-48 hours
Summary: Multiplex nucleic acid amplification test that detects 20 commonly encountered respiratory viruses. This panel does detect SARS-CoV-2.

If you have questions, please contact your Beaumont Laboratory Customer Service Department:

- Farmington Hills, Grosse Pointe, Royal Oak and Troy: 800-551-0488 or 248-551-1155, Option 5
- Dearborn, Taylor, Trenton and Wayne: 800-245-3725, Option 1
