

Urine Acetaminophen and Salicylates Discontinuation

Effective Date: August 23, 2022

Beaumont Laboratory will no longer offer urine acetaminophen and salicylates as part of the Comprehensive Drug Analysis with Confirmation test after August 23, 2022. Urine acetaminophen and urine salicylate are not useful for predicting toxicity of these drugs. If there is any concern for toxicity, drug levels should be evaluated in blood.

Beaumont Laboratory will continue to offer Acetaminophen Level and Salicylate Level in blood.

Test Ordering Option:

Name	Order Code	CPT Code	Specimen	Schedule
Acetaminophen Level	LAB5367	80329	Red-top Tube	Routine: 24hr TAT Stat: 1hr TAT
Salicylate Level	LAB5415	80329	Red-top Tube	Routine: 24hr TAT Stat: 1hr TAT

Date submitted: August 12, 2022
