Chlamydia/Neisseria gonorrhoea (Throat/Rectum) – Testing Update ***Dearborn- Taylor-Trenton-Wayne*** **Effective Date: December 18, 2019**

Beaumont Laboratory will now test throat and rectum sources for Chlamydia and Neisseria gonorrhoeae at Dearborn Laboratory using Cepheid Xpert technology. This will allow a highly sensitive and specific Nucleic Acid Amplification method to be performed on one sample (per source) with a faster turn around time. Collection devices will change to the Xpert Swab Specimen Collection Kit for these sources only.

Test Information:

Name: *Chlamydia/GC AMP DNA Probe*
Order Codes: Sunquest: CHGCAP
Specimen: *Throat or Rectum sources use Xpert Swab Specimen Collection Kit*
Schedule: Testing will be performed Monday - Friday.
Method: Cepheid Gene Xpert NAAT.

Submitted by: Jeremy T. Powers M.D, Chief of Pathology Dearborn
